# ANTI-PHISHING & EMAIL SECURITY

## ENDIDA
### NEXT GENERATION CYBER DEFENCE

# SECURE YOUR EMAIL AND CHANGE USER BEHAVIOUR

Phishing is still the number one cause of corporate data breaches, and the hooks are getting sharper. Today's threat actors employ various incredibly sophisticated techniques that elude even the most sceptical and well-trained eyes. This is where Endida's Anti-Phishing and Email Security solution excels – through innovative computer vision, AI, and machine learning it stops and catches everything quickly and without slowing down productivity.

## SOCIAL GRAPHING
Endida gets to know users and detects anyone impersonating someone from within the organisation or external.

## COMPUTER VISION
Self-adapting AI algorithms and a deep understanding of how email works is what makes Endida effective at keeping up with zero-day attacks.

## THE BANNER
Colour-coded banners on every email offer threat assistance to your employees in real-time.

## MOBILE PROTECTION
Email protection that works across any device and any email client.

## THE DASHBOARD
Admins have complete control over customisation and how your end-users will interact with Endida's banners.

## REPORTING
Identify, analyse, and remediate from one pane of glass, making it easy to identify trends and share reports with the executive team.
