ENDIDA

WHO ARE WE?

Endida is a pioneer in next-gen AI-driven cybersecurity, blending innovation with unparalleled protection to protect users against evolving threats and enhance operational efficiency. Committed to innovation, our advanced product suite not only safeguards businesses but also delivers tangible ROI.

OUR SOLUTIONS

PEN TESTING

Endida's AI, Autonomous Pen Testing as a service (PtaaS) platform gives more thorough, faster and superior results with unlimited re-testing.

ZTNA - SERVERLESS VPN

Secure access to anything from anywhere. Endida's ZTNA is a VPN replacement that doesn't require hardware or firewall configuration.

SECURE WEB GATEWAY

Endida's Secure Web Gateway provides advanced network protection by inspecting any web browsing and app usage against company policy.

ANTI-PHISHING

Endida's email security solution uses innovative computer vision, AI and machine learning to stop and catch suspicious email and educate users.

CONSULTING

Endida's consulting ranges from bespoke remediation strategies, to ensuring your digital infrastructure remains robust against zero-day threats..
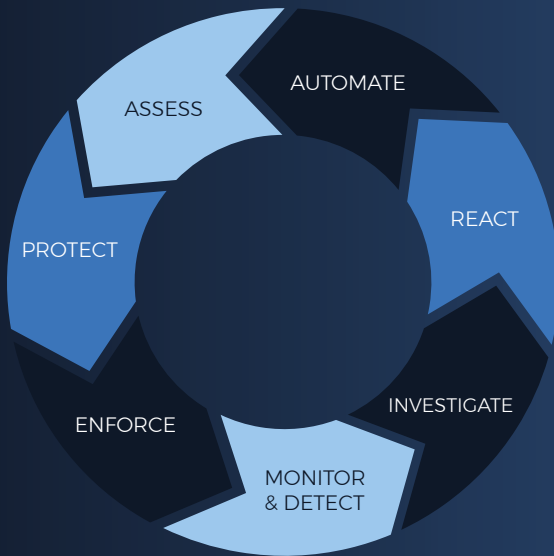

ENDPOINT PROTECTION

Endida's Advanced EDR Solution uses analytics and machine learning algorithms to detect and automatically block malicious threats on endpoints.

ENDIDA'S CONTINUOUS APPROACH

AUTOMATE
Machine learning & Artificial Intelligence to continuously optimise your defence strategy

ASSESS
Assess the current state of your security and where vulnerabilities lie

PROTECT
Deploy active defences to every attack entry point in your network

ENFORCE
Deploy the right polices for users and data

MONITOR & DETECT
Collate data from everywhere, use AI for automated detection and triage of events

INVESTIGATE
Threat intelligence, correlation of attacks, human, AI and machine learning

REACT
Automate responses, apply rules and make informed decisions to contain, disable and reverse attacks

WHY ENDIDA?

SPEED AND AGILITY

Software and services that can be rapidly deployed and executed with minimal disruption

NEXT GENERATION TOOLS

Protect your entire attack surface with our best of breed suite of solutions

COST EFFICIENT

Helping you to reduce costs by optimising your existing platforms and reducing the workload of your team

AI AND MACHINE LEARNING

Dramatically increase response times by reducing false positives and automating incident responses

EXPERIENCED SPECIALISTS

Access to experts who can support you through every stage of the process

PROACTIVE SECURITY

Visibility and knowledge – discover threats using real-world attacks & fortify defences before adversaries can exploit
